LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE AND LABOR,

BUREAU OF THE CENSUS, Washington, D C, April 15, 1904.

SIR

I have the honor to transmit herewith the third edition of the Abstract of the Twelfth Census of the United States—The first edition of the Abstract was published in November, 1903—It proved so useful as a condensed summary of the ten quarto volumes containing the reports of the Twelfth Census that the popular demand exhausted the edition in six months—A second edition from the same plates was published and that is also exhausted—In addition to the material which appeared in the first and second editions of the Abstract, tables have been added relating to street and electric railways, central electric light and power stations, electric fire alarm and police patrol systems, and mines and quarries, together with a list of Census publications to date—The additional data embodies the results of all the supplemental inquiries required by the census law which have been completed to date

Very respectfully,

Director

Hon George B Cortelyou, Secretary of Commerce and Labor

PREFACE.

The Abstract is an epitome or digest of the contents of the ten volumes of the Twelfth Census, and is designed for the use of the general public who may not have access to the main volumes or may find this digest more convenient for ready reference. For this purpose the volume should be small, the information should be presented in tables because an item of information is found far more easily in a table than in text, and the tables should be arranged in a simple, orderly way so that any table wanted may be found without delay. It has been the endeavor to make the present volume fulfill these requirements

This Abstract conforms in the main to the one prepared for the Eleventh Census The present volume, however, contains no sections upon fisheries, transportation, insurance, wealth, debt and taxation, real estate mortgages, education, churches, insane, feeble-minded, deaf and dumb and blind, or crime, pauperism and benevolence. Reports on these subjects are not yet available, because in accordance with the requirements of the act providing for the Twelfth Census all special inquiries were postponed until the main reports were completed. Future editions of the Abstract may incorporate their results.

The Abstract is divided into four paits, Population, Mortality, Agriculture, and Manufactures, corresponding to the four main lines of inquiry ordered by the census act of March 3, 1899

In each part the first series of tables is for the largest area, the second series is for the states and territories, the third for the cities, the order being thus, as a rule, that from the greater to the less — For obvious reasons, in the part relating to agriculture, the series of tables for cities is lacking

The area, to which the first series of tables for population, agriculture, and manufactures relates, is continental United States, by which is meant that part of the United States lying on the continent of North America south of the Canadian boundary It thus excludes Alaska and the recent insular accessions of Hawaii, Porto Rico, the Philippine Islands, Guam, Samoa, and, it it be a part of the United States, the Isle of Pines As all this territory except Alaska has been acquired since 1890, as the Twelfth Census covers no part of it except Alaska and Hawaii, and as it comprises populations living under peculiar conditions and having distinctive characteristics, it has been deemed best to confine the first series of tables, with one exception (Table 1), to the area comprised in continental United States, and not to attempt to cover either the entire United States, for which there is practically no statistical information, or the area covered by the Twelfth Census, which includes Alaska, Hawan, and the military and naval stations outside continental United States. However, in the second series of tables, those for states and territories, the figures for Alaska, Hawan, and the military and naval stations are given, but at the end of the table rather than in one alphabetical series with the states and territories of continental United States. The latter is divided geographically into five divisions, which, with the states and territories included under them, are as follows.

xiv Preface.

NORTH ATLANTIC DIVISION

Maine Massachusetts New York
New Hampshire. Rhode Island New Jersey
Vermont Connecticut Pennsylvania

SOUTH ATLANTIC DIVISION.

Delaware Virginia South Carolina.

Maryland West Virginia Georgia

District of Columbia. North Carolina Florida

NORTH CENTRAL DIVISION

Ohio Wisconsin North Dakota Indiana Minnesota South Dakota. Illinois. Iowa Nebraska Michigan Missouri Kansas

SOUTH CENTRAL DIVISION

KentuckyMississippiIndian TerritoryTennessee.LouisianaOklahomaAlabamaArkansasTexas.

WESTERN DIVISION

Montana New Mexico Washington
Idaho Arizona Oregon
Wyoming Utah California
Colorado. Nevada

These five groups have been placed at the head of each table for states and territories directly under continental United States

Census statistics for 1900 relate either to the census day—June 1, 1900—or to the census year—June 1, 1899, to May 31, 1900, inclusive—except that crop statistics are reported for the crop year, 1899, and all manufacturing statistics for the business year most nearly conforming, in each case, to the census year

This Abstract differs from that of the Eleventh Census in reproducing the figures for the Twelfth Census with much greater completeness than those for the Eleventh Census were reproduced in the previous Abstract. No small part of the additional pages required for these extensions has been gained by the exclusion of figures for earlier censuses from all tables except those for continental United States. This exclusion is due to the belief that detailed figures of censuses prior to 1890 are less desired by the majority of persons who will use the Abstract than approximately complete figures for 1900, or at most for 1890 and 1900, the two together indicating present conditions and the amount and direction of changes now in progress

At the head of each table a reference in brackets is given to the volume and page of the extended Census Reports from which the figures have been drawn. If information regarding the subject is desired in greater detail or for smaller territorial subdivisions, it may usually be found at or immediately following the place referred to. The Abstract will thus serve to a degree as a classified index of the ten quarto volumes of figures and interpretations constituting the Twelfth Census of the United States.

The Census Office often finds it necessary to give to words, which in ordinary speech have a vague and indefinite meaning, a more exact and precise signification. In so doing, the popular interpretation, while always the basis of the definitions, is often

Preface. xv

narrowed or widened to meet special requirements. For example, ordinary speech does not regard a canal boat or hotel as a dwelling, a person living alone as a family or a greenhouse requiring for its care the entire time of at least one person as a farm, yet in each of these instances the Census Office finds itself obliged thus to widen the popular definition. That the special meaning assigned to such words or phrases may be made clear, a glossary is provided (pages 445 to 447) which contains the definition of all terms employed in the Abstract in an unusual or technical sense.

United States Census Office,
Washington, D. C., November 1, 1902.

⁶ Comprises negroes, mulattoes, Hawanans, Malays, and Portuguese mulattoes from the Cape Verde Islands.

⁶ Reported in 1890 as Mongolians, chiefly Chinese, with a few Japanese

⁷ Hawani had a population of 89,990 (white 60,628, Chinese 17,002, Japanese 12,860) according to the census taken as of December 28, 1890, under the direction of the Hawanan government

TABLE 40.—POPULATION CLASSIFIED BY NATIVITY 1900 AND 1890 [Twelfth Census, Vol I, pages xcix, ciii, and 485]

¹Includes the population specially enumerated
¹Decrease
²At the census of 1890 all natives of Alaska born previous to its acquisition in 1867 by the United
States were classed as foreign born, but at the census of 1900 all natives of Alaska, irrespective of age, are classed as native
⁴Hawaii had a population of 89,930 (native 48,117, foreign born 41,873) according to the census taken as of December 28, 1890, under the direction of the Hawaiian government.

¹This table includes all incorporated places having at least 2,500 inhabitants, so far as they have been returned by the census enumerators separate from the population of the townships, precincts, districts, etc., of which they form a part — It also includes two unincorporated places in Alaska, one unincorporated place in Hawaii, and all towns in the New England states which have a population of at least 2,500, but which do not contain an incorporated place with that amount of population No attempt was made at the Twelfth Census to ascertain the population of unincorporated places.

¹ Part of Apache taken to form Navajo in 1895
2 Coconino organized from part of Yavapai in 1891
3 The area of San Carlos Indian reservation included in that of Gila, Graham, and Navajo counties
4 Exclusive of population of San Carlos Indian reservation
5 Part of Pima taken to form Santa Cruz in 1899
6 In Gila, Graham, and Navajo counties, but the population in each county was not separately

Theo of Greene annexed to Clay since 1890

Part of Franklin annexed to Crawford since 1890

Part of Howard annexed to Sevier since 1890

Part taken to form Glenn in 1892

Part taken to form Madera in 1893

¹Land and water surface ²The figures given for 1890 are derived from the census taken as of December 28, 1890, under the direction of the Hawaiian government ³Not separately returned in 1890 ⁴Not separately returned ⁵Returned with Molokai in 1890.

⁵ Returned with Molokai in 1890.
6 Includes population of Lanai
7 Canyon organized from part of Ada in 1892
8 Taken to form part of Blaine in 1895
9 Organized from part of Bingham in 1893
10 Parts taken to form Bannock and part of Fremont in 1895.
11 Organized from Alturas and part of Logan in 1895.
12 Organized from parts of Bingham and Lemhi in 1893
13 Part taken to form part of Fremont in 1893
14 Organized from parts of Bingham and Lemhi in 1893
15 Taken to form Lincoln and part of Blaine in 1895

¹Scotland organized from part of Richmond in 1900 ²No returns in 1890 Part annexed to Billings in 1897, and part taken to form part of Williams since 1890

Sowman, McKenzie, and part of Alred annexed in 1897
5 Annexed to Billings in 1897
6 Taken to form part of Williams since 1890
7 Annexed to McHenry, McLean, and Pierce since 1890.
8 Annexed to Stark in 1897. ⁴ Part of Renville annexed in 1897.

Annexed to McLean in 1891.

10 Part of Church annexed since 1890

¹¹Garfield and Sheridan annexed in 1891, and parts of Church and Stevens annexed since 1890

18 Part of former Williams annexed since 1890

18 Annexed to Ward in 1891.

14 Annexed to Bothneau and Ward in 1897

15 Dunn, Hettinger, and Wallace annexed in 1897, and part or former Williams annexed since 1890.

16 Parts annexed to McLean and Ward since 1890

17 Mountrailleannexed in 1891, part of Renville annexed in 1897, and part of Stevensannexed since 1890

1890

18 Annexed to Mercer and Stark since 1890

19 Organized from Buford, Flannery, and part of Alred since 1890.

20 Indian reservation, for remainder of reservation see South Dakota.

21 The area of that part of Standing Rock Indian reservation in North Dakota included in that of Morton county.

22 Population of Fort Yates and Standing Rock Indian agency, exclusive of reservation Indians.

1 Pratt and Presho annexed to Lyman in 1899
2 Annexed to Butte in 1899
Located within the limits of Cheyenne River and Standing Rock Indian reservations.
4 Annexed to Meade in 1899.
5 Located within the limits of Pine Ridge Indian reservation of Jackson, Nowlin, and Sterling annexed in 1899
7 Annexed to Stanley in 1899
8 Annexed to Gregory in 1899
9 Located within the limits of Rosebud Indian reservation.
10 Located within the limits of Pine Ridge and Rosebud Indian reservations
11 No returns for part outside Pine Ridge Indian reservation.
12 Annexed to Pennington in 1899.
13 Located in Armstrong, Dewey, Schnasse, and Stanley counties, but division by counties can not made be made

be made

14 Area included in that of the counties in which the reservation is located

15 Located in Lugenbeel, Shannon, Stanley, Washabaugh, and Washington counties, but division
by counties can not be made

15 Located in Gregory, Lugenbeel, Lyman, Meyer, Stanley, Tripp, and Washabaugh counties, but
division by counties can not be made.

17 Located in Boreman, Dewey, and Schnasse counties, but division by counties can not be made
For population of remainder of reservation see figures for North Dakota.

16 Part of Cheyenne River and Standing Rock Indian reservations.

19 Part annexed to Lewis in 1897

20 Parts of Hickman and Wayne annexed in 1897

4 Parts taken to form Vilas and part of Iron in 1893, part of Forest annexed since 1890.
5 Organized from part of Oneida in 1893
6 Bighorn organized from parts of Fremont and Johnson in 1897
7 Weston organized from part of Crook in 1890, but act did not take effect until 1891
8 The area of Yellowstone National Park included in that of Unita county
9 Exclusive of population of Yellowstone National Park, returned with Unita county in 1890,

Mortality

THE REGISTRATION AREA.

The following tables of mortality statistics are limited to the registration area, which embraces 10 registration states—namely, Connecticut, District of Columbia, Maine, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Rhode Island, and Vermont—and outside these states 153 registration cities. These are all states and all cities having at least 8,000 inhabitants, for which the registration of deaths under local laws and ordinances was found to be sufficiently accurate for use by the Census Office. The population of the registration area in 1900 was 28,807,269, or about 38 per cent of the entire population of continental United States.

At the beginning of each table a summary is given for-

- 1. The registration area, comprising registration states and registration cities in other states
 - 2 All registration cities (346 in number)
 - 3. Registration states
 - (a) Total
 - (b) Registration cities (193 in number).
 - (c) The remainder of the states
 - 4. Registration cities in states other than the registration states (153 in number) All tables relate to the census year ending May 31, 1900

¹ Not including farms of less than 3 acres, which reported the sale of less than \$500 worth of products in the census year

TABLE 101 .- VALUE OF FARM PROPERTY 1850 TO 1900

[Twelfth Census, Vol V, pages xxxiv, 694, 696, 698, and 700]

		VALUE		OF VALUÉ PROPERTY			
YE≜R	All farm property	Farmland, with Improvements, Including buildings	Implements and ma- chmery.	Live stock	Farm land, with improve- ments, including buildings.	Imple- ments and ma- chinery.	Live stock
1900	\$20, 439, 901, 164 16, 082, 267, 689 12, 180, 501, 538 11, 121, 958, 747 7, 980, 493, 063 3, 967, 343, 580	\$16, 614, 647, 491 13, 279, 252, 649 10, 197, 696, 776 9, 262, 803, 861 6, 645, 045, 007 3, 271, 575, 426	\$749, 775, 970 191, 217, 467 106, 520, 055 8 66, 878, 429 246, 118, 141 151, 587, 638	2\$3,075,477,708 \$2,308,767,573 \$1,576,884,707 \$1,525,276,457 \$1,089,329,915 \$544,180,516	81. 8 82. 6 83 7 83. 8 83. 8 82. 5	3.7 8.1 8.8 3.0 3.1 3.8	15 0 14.3 18.0 18.7 18 6 13.7

¹ Value of land, with improvements, except buildings, \$13,058,007,995, value of buildings, \$3,556,639,496. The Twelith Census was the first to collect separate statistics of buildings on larms

Including value of live stock on ranges as well as on farms
Value of domestic animals, \$2,979,197,586. This figure is more nearly comparable than that in the table with the returns for value of live stock at earlier censuses

Including estimated value of live stock on ranges

Value of 1870 were reported in depreciated currency
To reduce to specio basis of other years they must be diminished one-fitth.

Including only the reported value of live stock on farms

TABLE 102.—NUMBER OF FARMS OF SPECIFIED ACREAGE 1900, 1890, AND 1880. [Twelfth Census, Vol. V, pages xlv and 690]

From to 1890 asses and purros were enumerated with mittes

For purposes of comparison, spring calves, coits, and lambs are not included in the total numbers of neat cattle, horses and mules, and sheep, respectively, for 1900 In 1850 they were excluded from reports by instructions to enumerators For other census years, no instructions were given concerning them. It is probable that a few, but not all, were reported For figures for the total number of domestic animals on farms and ranges in 1900, see Table 122

Including estimated number of range animals separately reported

No separate report or estimate of range animals

¹ Not reported prior to 1890. 2 Not including acreage of cornstalks 3 Including states not reporting for 1900 4 The acreage of beans and pease for the years 1890 and 1880 was not reported. 5 The census of 1880 gave acreage for but 13 states, owing to unsatisfactory reports.

¹ Includes, for comparative purposes, 85 governmental establishments in the District of Columbia having products valued at \$9,857,355, the statistics of such establishments for 1890 not being separable (See Twelith Consus, Vol. VIII, page 120)
² Includes proprietors and firm members, with their salaries, number only reported in 1900, but not included in this table (See preceding table)
³ Not reported separately

4 Decrease.

5 Not reported

Note—Exact comparisons between the censuses shown in this table are difficult and sometimes impossible on account of changes which have taken place from census to census in the form of inquiries contained in the schedules, in the industries canvassed, and in the methods of compileation Comparisons between the censuses of 1890 and 1900 are more exact than has ever before been the ease; but even between these two censuses there are certain important differences in the forms of inquiry, or the methods of handling the statistics in compilation, to which careful attention should be paid

be paid

1 Capital—It can not be assumed that any true comparability exists between the statistics on this subject elicited prior to 1890. At the census of 1880 the question read "Capital (real and personal) invested in the business" At the census of 1890 live capital, 1 e, cash on hand, bills receivable, insettled ledger accounts, raw materials, stock in process of manufacture, finished products on hand, and other sundries, was for the first time included as a separate and distinct item of capital, and the capital invested in reality was divided between land, buildings, and machinery. The form of this inquiry at the census of 1890 and 1900 was so similar that comparison may be safely made.

2. Salaried officials—No comparison of the statistics of the number and salaries of salaried officials of any character can be made between the reports of any censuses. Not until the census of 1890 did the census of the handly between salaried officials 1 e, employees engaged at a fixed com-

of any character can be made between the reports of any censuses Not until the census of 1890 did the census begin to differentiate sharply between salaried officials, 1 e, employees engaged at a fixed compensation per annum, and the wage-earning class, 1 e, employees engaged at a fixed compensation per annum, and the wage-earning class, 1 e, employees paid by the hour, the day, the week, or the piece, for work performed and only for such work. Prior to 1890 such salaried officials, if returned at all, were returned with the wage-earners proper. At the census of 1890 the number and salaries of proprietors and firm members actively engaged in the business, or in supervision, were reported, combined with clerks and other officials. Where proprietors and firm members were reported without salaries, the amount that would ordinarily be paid for similar services was estimated. At the census of 1900 the number of proprietors and firm members actively engaged in industry or in supervision was ascertained, but no salaries were reported for this class, salaries, as a

matter of fact, being rarely paid in such cases, proprietors and firm members depending upon the earnings of the business for their compensation

3 Employees and wages.—At the censuses of 1850 and 1860 the inquiries regarding employees and wages called for "the average number of hands employed male, female," "the average monthly cost of male labor," and "the average monthly cost of female labor." At the census of 1870 the average number of hands employed was called for, divided between "males above 16 years, females above 15 years, and children and youth," and the "total amount paid in wages during the year" was first called for. The inquiries at the census of 1880 were like those of 1870, though more extended for some of the selected radiatives. for some of the selected industries

At the census of 1890 the average number of persons employed during the entire year was called for, At the consus of 1890 the average number of persons employed during the entire year was called for, and also the average number employed at stated weekly rates of pay, and the average number as computed for the actual time the establishments were reported as being in operation. At the census of 1900 the greatest and least numbers of employees were reported, and also the average number employed during each month of the year. The average number of wage-earners (men, women, and children) employed during the entire year was computed in the Census Office by using 12, the number of calendar months, as a divisor into the total of the average numbers reported for each month. This difference in the method of ascertaining the average number of wage-earners during the entire year resulted in a version in the average number as between the two consists.

This difference in the method of ascertaining the average number or wage-earners during the entire year resulted in a variation in the average number as between the two censuses.

Furthermore, the schedules for 1890 included in the wage-earning class "overseers, and foremen or superintendents (not general superintendents or managers)," while the census of 1990 separates from the wage-earning class such salaried employees as general superintendents, clerks, and salesmen. It is probable that this change in the form of the question has resulted in eliminating from the wage-earners, as reported by the present census, many high-salaried employees included in 1890.

4 Miscellaneous expenses—This item was not shown at any census prior to that of 1890 Comparison between the totals reported can safely be made between the last two censuses.

5 Materials—The same statement is two regarding the materials used in manufactures. With the

between the totals reported can safely be made between the last two censuses

5. Materials—The same statement is true regarding the materials used in manufactures

With the exception of the schedules on which a few selected industries were reported at the census of 1880, the question concerning materials was as follows: "Value of materials used (including mill supplies and fuel)." At the census of 1890 the schedule contained separate questions as to the kind, quantity, and cost of the principal materials, and the cost of "mill supplies." "fuel," and "all other materials". The amounts paid for rent of power and heat were also included under this head in 1890. It is probable that some of the items included in the cost of materials at the census of 1880 were included in "miscellaneous expenses" at the inquiries of 1890 and 1800.

6 Products—These statistics are comparable beginning with the census of 1870. For a fuller discussion of this subject see Twelith Census, Vol. VII, page lxi.

¹ No reports received for this industry in 1880
² Includes 108 establishments in 1900 and 78 in 1890 reported as "cars and general shop construction and repairs by street railroad companies," 65 in 1900 and 71 in 1890 reported as "cars, steam railroad, not including operations of railroad companies" and 20 in 1900 and 17 in 1890 reported as "cars, steam railroad, not including operations of railroad companies" and 20 in 1900 and 17 in 1890 reported as "cars, street railroad, not included in other classifications in 1900.
¹ Included in "timber products, not manufactured at mill," in 1890
¹ Included 113 establishments in 1900 and 160 in 1890 reported as "cheese and butter, urban dairy products," and 9,242 in 1900 and 4,552 in 1890 reported as "cheese, butter, and condensed milk, factory product."
¹ In 1880 includes 3 establishments reported as "carel ton" and 500 or "farmer or a literature".

⁶ In 1880 includes 3 establishments reported as "coal tar" and 592 as "drugs and chemicals"

⁷ Includes 22,134 establishments in 1900 and 13,591 in 1890 reported as "clothing, men's, custom work
and repairing," 5,731 in 1900 and 4,867 in 1890 reported as "clothing, men's, factory product," and 149
in 1900 and 200 in 1890 reported as "clothing, men's, factory product, buttonholes"

¹No reports received for this industry in 1900
2 No reports received for this industry in 1880
3 In 1880 includes 36 establishments reported as "electrical apparatus and supplies" and 40 as "telegraph and telephone apparatus"
4 No reports received for this industry in 1880 or 1890
5 In 1890 the data for this industry were confined to New York state, District of Columbia, and the city of St. Louis, Mo., in 1900 no reports were received
5 Includes 19 establishments in 1890 and 3 in 1890 reported as "enameled goods," and 27 in 1890 and 19 in 1880 reported as "enameling."

¹ No reports received for this industry in 1880 or 1890

1 Includes 17 establishments in 1880 and 3 in 1880 reported as "bellows," and 139 in 1890 and 57 in 1880 reported as "leather goods"

3 In 1890 includes 38 establishments reported as "leather, dressed skins," 121 as "leather, morocco," 32 as "leather, patent and enameled," and 1,596 as "leather, tanned and curried", in 1880 includes 2,319 reported as "leather, curried," 202 as "leather, dressed skins," 2 as "leather, patent and enameled," and 3,105 as "leather, tanned"

4 At the census of 1880 an establishment engaged in both tanning and currying made a separate report for each branch of the industry, and was counted twice, in 1890 and 1900 but one report was received for each establishment

¹ In 1890 includes 21,011 establishments reported as "lumber and other mill products from logs or bolts" and 1,606 as "timber products, not manufactured at mill", in 1880 includes 25,708 reported as "lumber, sawed," 45 as "shingles, split," and 5 as "veneering" and 1,288 as "sash, doors, and blinds"

and blinds."

3 Incl. dos 2 351 cetablishmen's in 1900 and 1,321 in 1890 reported as "marble and stone work," and
3,719 in 1907 and 2 652 in 1807 reported is "monuments and tombstones."

1 Incl. do. 6 131 cetablishmen's in 1600 and 5,969 in 1890 reported as "masonry, brick and stone,"
and 1 902 in 1900 and 1 35 in 1800 reported as "plastering and stuccowork."

No resolutive received 1 is this it dustry in 1880.

5 Includes 7 cetablishments in 1800 and 1900.

7 Includes 7 cetablishments in 1800 and 1900.

30 to 1800 reported as "noted ones in 1800 and 1800 reported as "eigar molds," and 449 in 1890 and

^{230 11 1880} reported as ' model- and patterns"

¹ Included in other classifications in 1880
2 In 1900 includes 15,295 establishments reported as "painting, house, sign, etc.," and 1,644 as "paper hanging"
3 In 1890 includes 567 establishments reported as "paper" and 82 as "pulp, wood"; in 1880 includes 692 reported as "paper" and 50 as "wood pulp"
4 In 1880 "petroleum refining" formed part of a separate report, and was not included in the general statistics of manufacture
6 No reports received for this industry in 1880, in 1890 included in "all other industries"

¹In 1880 and 1890 reported as "tar and turpentine"

²No reports received for this industry in 1880 or 1890
³No reports received for this industry in 1880 or 1890
¹In 1880 and 1890 reported as "upholstery materials"
⁵Includes 4 establishments in 1890 and 2 in 1880 reported as "clock cases and materials," and 32 in 1890 and 20 in 1880 as "watch and clock materials,"

TABLE 154.-COMPARATIVE SUMMARY, BY SPECIFIED INDUSTRIES 1900, 1890, AND 1880-Concluded

10	Zinc, smelting and re- fining ⁸	1900	81	14, 141, 810	4, 869	2, 355, 921	13, 286, 058	18, 188, 498
	All other industries 4	1900 1890	4 12	447, 959 2, 952, 222	132 1,699	58, 661 559, 632	299, 339 1, 773, 808	503, 449 3, 142, 145

¹In 1880 includes 206 establishments reported as "handles, wooden," and 710 as "wood, turned and carved"

²Included in other classifications in 1880 and 1890

³The report for "zinc" in 1880 and 1890 differed in several particulars from that for "zinc, smelting and refining," in 1900, and a comparison between these industries is therefore impracticable.

⁴In 1900 embraces collars and cuffs, paper, 1, cotton, cleaning and rehandling, 2, fuel, artificial, 1; in 1890 embraces fuel, artificial, 2, phonographs and graphophones, 2, racking hose, 1, rubber, vulcanized, 1, sugar and molasses, beet, 2, thread, linen, 2, tinfoil, 2

sing companies, 797 reported the number of employees and 811 the number of fare passengers carried

* Includes 6 06 miles operated by compressed au

* Decrease

Note—The statistics for 1902 cover all street and electric railways in the United States that were
in operation during any part of the year ending June 80, 1902. The term "street and electric railways," as here used, includes all electric railways irrespective of their length or location, and all
street railways irrespective of their motive power

As shown by footnotes to the tables, a few companies failed to make complete reports for 1902 and
a number of companies failed to make reports of any character at the census of 1890, but the missing
data was estimated in 1880 for the items shown in Tables 178 and 179.

Number of companies—The consolidation of independent companies and the method of controlling a
number of companies under the lease system, which has become so prevalent during the past decade,
make it misleading to use the company as a unit to measure the increase or decrease in the number of
new railways built during the period of twelve years. Of the 789 street railways in the United States
in 1890, many have been merged in new companies. In some cases the merged companies have
retained their distinctive names and have kept separate accounts of equipment, income, expenses, etc
in such cases, when separate reports were made to the Bureau of the Census, they were counted as
independent companies. An example of this appears in the District of Columbia, for which there were
8 companies reported, but the railways represented by these reports were all controlled by 2 companies
In a number of instances the companies forming the consolidation lost their individuality, and an
entirely different name was given to the consolidation company, which made a single report covering
the operations of all the controlled companies. In cases where a number of roads were operated
under leases one report was made for the lessee company, covering all of the leaser

of such service

of such service

Other permanent investments—In addition to investments in electric light plants, a large number of companies had other permanent investments, such as investments in gas and water plants, in bridges, and in securities of other street railways. Whenever practicable, these other permanent investments were eliminated from the total capital habilities before computing the habilities per mile of track owned.

The "length of line" means the length of the roadbed, or, in the case of a railway lying entirely within city limits, the length of street occupied. In determining the length of single track, switches and sidings are included, and double track is reckoned as two tracks. A number of miles of track were in various stages of completion, but it was impracticable to fix upon any stage of the work at which the trackage could be enumerated other than that of actual completion. The statistics concerning track located on private right of way refer particularly to rural electric railways, many of which have bought or have had surrendered to them a separate roadbed, either adjoining or independent of the highway, in the same manner as a steam railroad. Occasionally the railway is built on a private right of way not owned by the company, an example of which would be a toll bridge owned by a bridge company, to whom payment for the privilege of using it was made.

The inquiries concerning the location of track, whether within or without city limits, were made with the intention of ascertaining the relative length of track operated in urban and rural districts. In a number of cases it was impossible to determine exactly the trackage that should be assigned to these two subdivisions. In some instances the track was within or passed through thickly settled communities that were not organized as cities or towns, and therefore had no legal limits, and it was difficult to obtain the length that should be considered as within the urban district. In the New England states densely populated communities are legally part of the town government, which includes also rural districts. Many companies in Massachusetts reported that it was impracticable to make the distinction, and accordingly the trackage for that state has not been included in this classification

Car mileage and car hours -As a rule, car mileage and car hours were computed on a basis of sin-Car mileage and car hours—As a fule, car mileage and car hours were computed on a basis of single cars, but in a few cases the motor car and its accompanying trailer were considered as one car. The total, therefore, contains a small amount of train mileage, and allowance should be made for this fact in considering the average fare passengers per car mile and car hour.

Mail carried—There were 286 companies engaged to some extent in carrying mail.

Maximum speed of cars—It was impossible to obtain exact information concerning the average speed per mile of cars. The maximum speed within city limits varies from 3 to 40 miles, and outside city livits from 3 to 60 miles have been seen to be a considerable of the considera

speed per mile of cars. The maximum speed within city limits varies from 3 to 40 miles, and outside city limits from 3 to 60 miles per hour.

Rails—The style of rail and average weight of rail per yard can not be given as a United Statos total, but is presented in detail for each company. The minimum weight of rail per yard varies from 15 to 113 pounds, and the maximum from 15 to 185 pounds. Of the 817 operating companies, 867 used T rails exclusively and 390 reported T rails in connection with girder, groove, or full groove **Horses**—There were 8,901 horses reported. A large proportion of these were used for motive power, while the remainder were used for miscellaneous purposes **Telephone service**—There were 256 companies that owned and operated an exclusive telephone service for car-dispatching purposes or other work incident to the operation of the road **This does not include the instruments or lines hired from telephone companies by street railway companies as subscribers. subscribers

Stations.—The number of stations relates only to the separate buildings or public shelters at which passengers wait to take cars, pay fares, or secure transfers. The number does not include stopping points, or open-air stations along the line, where passengers can mount or dismount, and which are often designated by a sign to that effect placed on an adjacent pole

1 Includes estimated income from public service

Note.—These statistics cover all central electric light and power stations in operation during any portion of the year ending June 30, 1902. Central electric stations supply current for commercial and private uses, such as heating and lighting private dwellings, business houses, hotels, and office buildings, and furnishing power for street railways, elevators, manufacturing purposes, and charging batteries. Electric current is also supplied for public service, in lighting streets, parks, and municipal buildings, and for various purposes connected with their maintenance. In addition to central electric stations there are two other sources of supply—light and power stations operated by electric railway companies and isolated electric plants operated to furnish light or power for the business of the owner. The statistics for the former are presented in the report on street and electric railways, but concerning the latter no detailed information has been secured. A number of companies had been organized but had not, at the time of the canvass, commenced the construction of the plant, while others were in various stages of completion, but had not commenced the generation of electric current. In some cases it was difficult to decide whether a plant should be classed as a central electric station or as an isolated plant. The general rule followed was to classify as isolated plants all those which were operated as an adjunct to some other business, the principal object of the plant being to supply the light or power for another industry, only incidental income being derived from the sale of current. This resulted in the exclusion of a number of plants which were considerably larger than some of the central stations. The equipment of many of the isolated plants in large hotels and office buildings would enable them to furnish light and electric power required for curies and towns of considerable size. While it is estimated that there were from 45,000 to 50,000 isolated plants in the United States, the majority of them w

During the year 1902 there were 252 electric railway companies that reported the generation of electric current for sale for light and power. Such plants are virtually central stations, and should be considered in connection with these statistics. Of the railway companies referred to, 118 reported that the generation of electric current for this purpose was of sufficient importance to enable them to give the number of lamps in use and the amount of income from the sale of current. Adding these Il8 stations to the central stations enumerated in this report, the number would be increased to 3,738, the total income from the sale of current to \$90,458,420, the number of arc lamps to 419,561, and of

the total income from the sale of current to \$90,458,420, the number of arc lamps to \$19,563, and or incandescent lamps to \$19,563,729.

The term "central electric station," as used in this report, sometimes includes a number of plants, but where two or more plants were operated by the same individual, firm, or corporation, and located in the same state, a separate report was secured for each whenever the system of accounts permitted the preparation of separate returns, otherwise one report was obtained to cover the operations of all plants. For instance, the Edison Electric Company, of Los Angeles, Cal, generates current in three mountain waterpower plants and four steam plants in different localities, all connected by transmission lines. These seven plants were included in one report and were counted as one station. There were 1,463 central electric stations operated by private companies or municipalities in connection with the manufacture of gas, the operation of waterworks or other industries. The statistics for such

stations relate exclusively to the generation of electric current, if book accounts were not available for exact information concerning the operation of the electric station as distinct from other business, careful estimates were prepared for the answer to each of the inquiries. But in cases where the central electric stations were operated by electric railways, the income and expenses incident to the generation of current for sale were so interwoven with the railway business that it was impossible to prepare separate reports, and the entire business of each company was included in the report for the

The industry had not developed sufficiently to be enumerated at the census of 1880. The first information appears in the reports of the census of 1890, but as statistics are presented only for the central stations and isolated plants in New York state and the central stations in the District of Columbia and the city of St Louis, no comparisons can be made to show the growth of the industry

in the entire country

In the entire country

The term "station" may include two or more electric plants, and as the date of installation of the station only is given, the figures do not indicate the total number of separate plants installed, several having come subsequently under one management. Each state and territory contains a number of central electric stations operated under private ownership, and all, with the exception of three territories, and the District of Columbia, Nevada, and Wyoming, report one or more municipal stations. Illinois contains the greatest number of stations operated under private ownership, and Ohio the greatest number under municipal control. The greatest proportion of central electric stations is found in the North Central states. In 1890 these states contained 43 1 per cent of all the electric stations in the United States, and in 1902 the proportion had increased to 47.1 per cent. The greatest percentage of increase in the number of stations is shown for the South Central states, where 79 stations had been installed up to 1890; this number increasing to 404 in 1902, or 411.4 per cent.

Note —These statistics relate to the application of the electric telegraph and telephone to the fire alarm and police patrol systems of the cities of the United States during the year ending December 31, 1902. They are confined to the physical equipment of the different systems and the amount of service rendered. Complete reports were obtained for all cities in which the systems were known to be in existence, with the exception of a few unimportant towns, in some of which the commercial telephone companies were utilized by the police and fire departments.

Mines and Quarries

Note.—The statistics cover the calendar year ending December 31, 1902, and are limited to the operations at the mine or quarry. If manufacturing, such as cutting and dressing of stone or the reducing or milling of ore, was done at the mine or quarry, and it was impossible to separate the statistics for the two branches of industry, the report includes the manufacturing operations. The inquiry covers all ores and minerals produced in commercial quantities.

Number of mines and operators—The term "mine" represents a distinct mining operation, one or more of which may be controlled by the same operator, but in some minerals, such as precious stones, small placer gold mining, and monazite, the mining operations in many instances are not carried on continuously at the same locality, and it is impossible to ascertain the number of distinct operations. The term "operator" represents the individual, company, or corporation that controls the mine The distinct mining operations under the control of the same operator and located in the same county were included in one report or in separate reports to suit the convenience of the operator, but if the distinct operations were situated in different counties, separate reports were made for each county Values—The values reported are the amounts received by the operator and should not be confused with the value of the metallic contents, such as refined gold or silver, copper, or pig iron.

Classification—The statistics are presented separately for minerals or products, but in some cases, two or more of these products were obtained from the same mine or quarry and it was impracticable to separate the employees, wages, and expenses incident to the production of each. For instance, if the chief product of a quarry was sandstone, the report was classified as "sandstones and quartites," though some of the product may have been sold as grandstones or oilstones. In order to avoid duplication, the by-products, when they form the finished product of the mine or quarry, are added to the c their production are included

Such a large percentage of gold, silver, copper, lead, and zinc are often obtained from the same ores that it was impracticable to segregate their values and at the same time to present products which would be in any degree harmonious with the employees, wages, and expenses incident to their production. The quantity and value of these metals are not definitely determined until the ore has been smelted. Smelting is a manufacturing process and therefore omitted from the mining census, but the metallic contents of the ore and bullion produced during the year 1902 and the gross value of the same as computed from the reports to the Census Office was gold 3,242,039 ounces, valued at \$55,623,906, silver 54,198,344 ounces, valued at \$27,282,107, copper 639,033,332 pounds, valued at \$71,192,014, lead 333,125 short tons, valued at \$18,181,018, zinc 527,121 short tons, valued at \$47,019,2014, lead 333,125 short tons, valued at \$18,181,018, zinc 527,121 short tons, valued at \$47,019,2014, lead 333,125 short tons, valued at \$18,181,018, zinc 527,121 short tons, valued at \$70,003,301. These are the values at the mines. Gold and silver were reported at the Eleventh Census in troy ounces and coming value Computed on the same basis, the production for 1902 amounted to 3,242,039 ounces of gold, valued at \$70,074,625. The Director of the Mint reports the production of gold for the United States, exclusive of Alaska, for the calendar year 1902, as 3,466,270 ounces, valued at \$71,654,200, and the production of silver as 55,408,000 ounces, valued at \$71,688,655. The disparity in these results is due to the fact that the Census Office collected the data directly from the mines and the Director of the Mint obtained the information from mints, assay offices, private refineries, and other reliable sources. refineries, and other reliable sources

refineries, and other reliable sources

The quantities and values reported by the Director of the Mint represent the refined product, a portion of which may have been mined during the preceding year, and, as a portion of the product reported by the Census Office as mined during 1902 would be included in the report of the Director of the Mint for the following year, the totals for the two offices for the same year can not agree Development work.—The statistics for development work include all mines and quarries that reported employees of any character but no production. It is probable that in some cases the mines were idle and the employees reported were engaged in preserving the property from deterioration Employees and wages—The average number of wage-earners employed during the entire year and the average number employed during each month, also the total number of days that the mine was

in operation were called for The average number was tested and corrected by using 12, the number of calendar months, as a divisor into the total of the average number reported for each month Comparsons.—The statistics for the mining industries at prior censuses were not uniform, and no general summary was made at either the census of 1880 or 1890. Therefore exact comparisons are impossible. It is stated in the introduction to the report of the Eleventh Census that "in all, 686,419 persons found employment directly in the mining industry, and depended upon this industry as their regular means of support. They received in wages \$265,290,643, or more than 52 per cent of the entire value of what they produced. In addition, the other expenditures aggregated \$115,874,135." In 1902 there were 45,115 salaried officials, and their salaries amounted to \$39,010,506. The average number of wage-earners employed during the entire year was 581,709, and they received in wages \$89,944,631. The miscellaneous expenses and cost of supplies and materials amounted to \$195,521,643. The products reported for 1889 amounted to \$587,280,662, but they include salt and other substances omitted from the mining census of 1902. Reducing the production to a comparative basis as shown in Table 200, by including for 1902 the value of refined copper, gold, silver, lead, and zinc, and eliminating from 1889 the product not reported in 1902 makes the total for 1889 amount to \$444,012,998, as compared with \$384,040,869 for 1902, an increase of \$440,027,871, or 99 1 per cent.

Porto Rico —The mining operations in the island of Porto Rico during 1902 were confined to production for local consumption, and it was impossible to secure reports on the schedules used for the canvass of continental United States. The statistics, therefore, are not included in these tables.

Alaşka.—No canvass was made of the gold mines of Alaska, it being impossible to obtain satisfactory reports from the shifting mining population of the territory. The census Office accepted

No production from domestic ores
Aluminum, quantity reduced from 47,468 pounds
Not included as a part of the census; no statistics other than production reported.

Not reported.

Not reported

Copper contents of all ores mined.

Copper contents of all ores mined.

Linched Copper contents of auriferous ores and placer bullion. Exclusive of Alaska in 1902

Includes land plaster, calcined plaster, and crude gypsum.

Nonargentiferous lead ore and lead contents of argentiferous and copper ores. No production

10 Includes slate ground as a pigment, 2,000 long tons, value \$20,000.

¹ Barrels
21,485,168 squares roofing slate reported, quantity for other uses not given
8 Stones.
4 Includes 2,600 tons crude
5 Includes land plaster, calcined plaster, and crude gypsum
6 Long tons
7 Includes 21,870 tons crude
8 Includes 21,670 tons ground
9 Includes 3,162 tons refined
10 Cut or sheet mica, 373,266 pounds, scrap or waste and rough as mined, 1,400 short tons
11 Pounds
12 Includes chrome ore, 1, magnesite, 1, molybdenum, 1; nickel and cobalt, 2, rutile, 1.

1 Long tons

²Includes operators as follows Bauxite, 1 (3 mines); cement, 1, graphite, 1, marble, 1; sulphur

and pyrite, 1

*Includes operators as follows

Fluorspar, 2, lead and zinc ore, 1; precious stones, 46 (1 mine),

*Includes operators as follows

Fluorspar, 2, lead and zinc ore, 1; precious stones, 46 (1 mine),

*Includes operators as follows

Asphaltum and bituminous rock, 1, fuller's earth, 2, gold and silver, 1, manganese ore, 2, marble, 1; mineral pigments, crude, 1, phosphate rock, 1, precious stones,

One mynes slate 1.

ver, 1, manganese ore, 2, marble, 1; mineral pigments, crude, 1, phosphate rock, 1, precious stones, 50 (no mines), slate, 1

*Includes 2 operators in Alaska.

*Barrels of 42 gallons

*Quicksilver, 28,972 flasks (761 pounds each) and cinnabar, 10,427 short tons.

*Includes 1 operator in Hawaii.

*Includes operators as follows Cement, 2, chrome ore, 1, gypsum, 1, infusorial earth, tripoli, and pumice, 1; lithium ore, 2, magnesite, 1, mica, 1 (10 mines), mineral pigments, crude, 2, sulphur and pyrite, 2, slate, 1, talc and soapstone, 1.

Glossary and List of Publications

GLOSSARY.

Alen.—A foreign born male of voting age who has neither been naturalized nor taken out first naturalization papers

Animal products.—Wool, mohair and goat hair, milk, butter and cheese made on farms, poultry, eggs, honey, wax, animals sold, and animals slaughtered

Area—The area of the United States (with the exception of Alaska and Hawaii) was determined by summing up the square degrees, i. e, the regions comprised between consecutive parallels and meridians. Along the coast and the boundary lines of the country the areas of the fractional square degrees were obtained by direct measurement by means of scales, in every case measuring the smaller portion, whether land or water, to avoid as far as possible the errors incident to the projections and scales of the maps.

The areas of the several states and territories were determined in a similar manner. In cases where the square degree is divided by boundary lines into two or more parts, these parts were distributed between or among the states by direct measurement from the best available maps, the sum of the parts being made to equal the whole, as determined by computation.

The areas of counties are the results of direct measurements from the best county maps, corrected arbitrarily in order to make them add up to the areas of the states.

Capital.—Includes land, buildings, machinery, tools, and implements, and live capital owned and borrowed Does not include value of rented property (See note, page 300)

Cash tenant —One who rents a farm for a fixed money rent or a stated amount of labor or of farm commodities

City —The term as used in Table 37 includes all incorporated places having at least 2,500 inhabitants, all New England towns of like size and not containing an incorporated place, two unincorporated places in Alaska, and one unincorporated place in Hawaii.

Colored.—Used in the census of Porto Rico, taken by the War Department, to include negroes, Mongolians, and persons of mixed race.

Continental United States — That part of the United States lying on the continent of North America south of the Canadian boundary (See Letter of transmittal, page xi)

Death rate—The number of deaths during the census year, compared with the population of the same area June 1, 1900. This may be expressed per 1,000, per 10,000, or per 100,000 of the population.

Dwelling —A place in which, at the time of the census, one or more persons regularly sleep. It need not be a dwelling in the usual sense of the word, it may be a room in a factory, store, or office building, a loft over a stable, a canal boat, a tent, or a wigwam. Hotels, boarding or lodging houses, and tenement or apartment houses are classed as dwellings.

Family—A group of individuals who jointly occupy a dwelling or part of a dwelling, or an individual living alone in any place of abode. All the occupants and employees of a hotel, if they regularly sleep there, make up a single family

Family, not private.—A hotel, boarding house, school, or institution, or a group composed of laborers at work on a farm, plantation, railroad, or road, of miners or lumbermen in camp, of the crew of a boat or vessel, of soldiers and sailors at a military post or station or on a naval vessel, etc.

Farm.—All the land under one management, used for raising crops and pasturing live stock, with the wood lots, swamps, and meadows connected therewith, and the farmer's residence and all other buildings used in connection with the farming operations. Market, truck, and fruit gardens, orchards, nurseries, cranberry marshes, greenhouses, and city dames are farms, provided the entire time of at least one individual is devoted to their care

Governmental establishments.—Manufacturing establishments operated by national, state, or municipal authorities, not including educational, eleemosynary, penal, and reformatory institutions.

Gross value of products —The value of all manufactured products reported during the census year. (See Net value of products.)

Hand trades.—The term includes the following industries. Bicycle and tricycle repairing; blacksmithing and wheelwrighting, boots and shoes, custom work and repairing, carpentering, clothing, men's, custom work and repairing; clothing, women's, dressmaking, dyeing and cleaning; furniture, cabinetmaking, repairing, and upholstering; lock and gun smithing; masonry, brick and stone; millinery, custom work, painting, house, sign, etc., paper hanging; plastering and stuccowork, plumbing, and gas and steam fitting, sewing machine repairing; taxidermy; typewriter repairing, and watch, clock, and jewelry repairing.

Hay and forage —Includes wild, salt, and prairie grasses, millet and Hungarian grasses, alfalfa or lucern, clover, grains cut green for hay, and forage crops.

Illiterates.—Persons at least 10 years of age unable to write any language.

Improved farm land .- See Unimproved farm land.

Indian.—The figures for Alaska include Eskimos.

Industrial combination.—This term includes cases where a number of formerly independent mills have been brought together into one company, under a charter obtained for that purpose. It includes, also, corporations organized for the purpose of holding the stock of other corporations, but not directly owning the plants and carrying on the manufacture. It excludes large establishments which have grown up not by combination but by the erection of new plants or the purchase of old ones; corporations engaged in the manufacture and distribution of gas and electric light and power; and combinations or associations of independent establishments and corporations, formed for the purpose of selling goods at uniform prices or through a single agency.

Males of voting age — Males at least 21 years of age.

Military and naval.—Persons in the military and naval service (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

Mongolian — Chinese and Japanese.

Nativity of parents.—Parent of unknown nativity considered native

Negro.-All persons of negro descent.

Net value of products — The gross value of products minus the cost of all materials purchased and used in a partly manufactured form. (See Gross value of products.)

North Atlantic division .- See Letter of transmittal, page xii.

North Central division - See Letter of transmittal, page xii.

Principal source of income.—Applied to a farm, the principal source of income is that product which in value exceeds any other product of the farm and at the same time constitutes at least 40 per cent of the value of all products not fed to live stock.

Race—An ethnical stock or a great division of mankind having in common certain distinguishing physical peculiarities. The races distinguished in this volume are the white or European, the negro or African, the red or American Indian, and the yel-

low or Mongolian, the last being subdivided in most cases into its two national groups, Chinese and Japanese.

Registration area. - See page 178.

Share tenant —One who rents a farm for a share (as one-third, one-half, or other proportion) of the products.

South Atlantic division .- See Letter of transmittal, page xii

South Central division .- See Letter of transmittal, page xii.

Unimproved farm land.—Farm land which has never been plowed, mown, or cropped, and also farm land once cultivated but now grown up to trees and shrubs.

Value of products.—The value as obtained or fixed at the shop or factory, not including commissions or expenses of the sales department Unless otherwise specified, this term represents the gross value of products. (See Gross value of products)

Wage-earners, average number.—Obtained by dividing the sum of the average numbers employed during each month of the census year by twelve. Persons employed by a contractor are classed as in his employment, and not as in the employment of the person or firm for whom the contract work is done.

Western division.—See Letter of transmittal, page xii

White population.—The figures for Hawaii include Hawaiians, part Hawaiians, and South Sea Islanders.
